DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 5,950,568. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim a collapsible/foldable structure comprising a top roof and bottom platform, front and rear collapsible walls each pivotally attached, the front wall having an opening, and a pair of sidewalls pivotally attached to the roof to facilitate inward collapse of the sidewalls when pivoted toward the bottom platform. The sidewalls defined by an upper and middle section pivotally attached to one another by a living hinge so that they can be pivoted inward towards the bottom platform. The top roof also comprising two roof sections pivotally attached to one another so the roof can collapse downward. The structure being made of a thermally insulating polymeric material.
